# About Intelligent Solutions DX

The NIH states that more than 70 million Americans are suffering from Digestive Disorders.

Intelligent Solutions DX, headquartered in Austin, Texas, is introducing The Next Generation in Food Sensitivity, Allergy and Tolerance Testing. With over \$2 million invested in The IS382 COMPLETE Food Sensitivity, Allergy and Tolerance Test, we assure our patients will receive the best possible care and information about what they can eat daily, every three days or should eliminate completely. **And we have eliminated the dreaded finger stick by changing to the next generation of blood collection!**

We currently have an opportunity for our IS382 COMPLETE Food Sensitivity, Allergy and Tolerance Test, that will require Registered Dietitians with Insurance experience to interview several thousand members of a large east coast operation, then Provide the DX Code and process the order for our test to Intelligent Solutions DX.

## What is the IS382 COMPLETE Test?

- Examines 382 foods as well as animal proteins, additives, latex, dyes, and pollens.
- Measures IgE, IgG/IgG4 and complement C3d – capturing immediate, delayed and amplified immune responses.
- Convenient home sample collection for patients; reports returned in ~2-3 weeks.
- ***See Sample Test Results***

## Your role as a consulting dietitian

- Conduct 30-45 minute virtual consultations with patients in your licensed state.
- Review diet/history/symptoms to assess suitability for testing.
- Complete our secure digital consultation form (via desktop/mobile) which will include the DX Code.
- Work as an independent contractor — you set your schedule, we handle everything else behind the scenes.

## Why this opportunity matters

- Expand your telehealth practice into advanced diagnostics and personalized nutrition.
- Access patients through our pipeline — no referral-hunting required.
- Focus on the patient: we manage logistics and admin.
- Enhance your professional profile as a remote dietitian working with modern diagnostic tools.
- Many patients may remain as your patients if you accept insurance.

## Requirements at a glance

- Active RDN or state-licensed dietitian in good standing.
- Credentialed by at least one major Medical Insurance Carrier.
- Comfortable with virtual consultations and digital note-taking.
- Working knowledge of dietitian service billing codes.
- Excellent communication/documentation skills.
- Reliable internet and hardware (webcam/mic).
